Utility Building Vandalism & Theft Equals **DANGER**

NTUA Hereby provides notice to customers of recent theft of utility system components causing outages in the Tsaile, Arizona Community. These outages are not system related. Our utility crews are addressing frozen water lines and water pump damages as a result of the theft and vandalism.

Utility facilities contain high voltage systems and are **VERY DANGEROUS**. Keep out of electric substations; pump houses and other utility facilities and buildings, as the equipment carries high voltage. Stay away from utility buildings marked "Danger," "High Voltage," or "Keep Out".

Tampering with any utility system can cause serious injury and may even cause death. Vandalism and theft is costly and could set off extensive power and utility outages.

Trespassing on NTUA property and any kind of tampering or vandalism is also a criminal offense. Offenders will be fully prosecuted to the extent of the law.

If you see any suspicious activity around NTUA utility facilities, immediately notify authorities or call 1-800-528-5011 (NTUA Utility Outage Emergency). The public is urged to report any non-utility personnel or vehicles around utility facilities.
