

Navajo Tribal Utility Authority Energy Conservation Awareness

Here are some helpful tips on energy conservation to save on costs:

Electric

- Turn off lights if you are not using them
- Use low-wattage/Compact Fluorescent bulbs in hallways & closets
- Turn off all electrical appliances not in use.
- Turn off your TV if you are not viewing it
- Turn off your radio if you are not listening to it
- Buy energy-efficient appliances

Water

- Turn off faucets as soon as you are done washing your hands
 - Use flow-restrictors to cut down on water usage
 - Limit your showers to five minutes by using a timer
 - Fix all leaks as soon as possible
 - Turn down your water heater temperature to 120-130°
- Don't let the water run while you brush your teeth or shaving
- Use water-saving shower heads at 2.5 gpm, and toilets at 3.0 gpf

Customers can pick up energy saving tips from their local NTUA office.
